

WESTLEY GROUP SALES HIT £125 MILLION

Five years ago James and Rob Salisbury took over the management and operational control of Westley Group. Since this time, the company has grown organically and via acquisition, with the addition of Walter Frank, Mathers Foundry and most recently J. T. Price. Westley Group now offers a broader range of cast and machined products than ever before, and is proud to have a workforce including some of the most skilled and knowledgeable casting experts in the world.

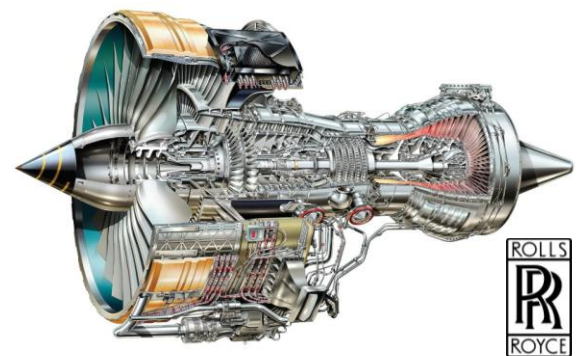

Teams at Francis Birketts, Spunalloys, Mathers, Westleys & J. T. Price and Walter Frank have worked with commitment and determination during trying economic circumstances, achieving unprecedented sales of £125 million in just over five years. Westley Group has returned to a profitable and sustainable position and is now widely recognised as the leading non-ferrous and ferrous foundry Group in the UK, with a major presence in Europe and further afield. Group customers range from small engineering firms to large blue-chip corporations such as Rolls Royce and BAE Systems.

ROLLS ROYCE SABRe APPROVAL FOR SPUNALLOYS

Westley Group's centrifugal casting facility, Spunalloys, has held Rolls Royce SABRe Manufacturing Approval for 20 years. The qualification was extended for a further year in January 2010 following a review and audit by Technical Surveillance Metallurgists from Rolls Royce Labs in Derby.

The approval covers the manufacture of centrifugal castings in various high chrome iron and stainless steel alloys. Materials are generally supplied to Rolls Royce 1st Tier Suppliers. All new parts produced have to be validated and tested to ensure the highest quality standards are achieved and meet with Rolls Royce exacting requirements.

Rings and seals produced by Spunalloys can be used in Rolls Royce Engines such as the Trent 700 (pictured).

JOKE OF THE MONTH:

"What did Andy Gallear from Walter Frank buy his new girlfriend for Valentine's Day?"

- A) Flowers?
